PHILIP MORRIS U.S.A.

INTEROFFICE CORRESPONDENCE

Richmond, Virginia

To: **Dr. S. Feng**
Dr. M. A. Sarkar

Date: **January 23, 2003**

From: **Jennifer Amador**

Subject: **Expression of anti-oxidant enzymes in peripheral blood cells**

I searched the Medline database using PubMed in order to locate published articles dealing with the expression of several anti-oxidant enzymes in peripheral blood cells. The exact search strategy is as follows:

(erythrocytes/me or erythrocytes/en or plasma/me or plasma/en) and (superoxide dismutase[mh] or catalase[mh] or glutathione peroxidase[mh])

This search retrieved 2411 citations, so I limited the search to articles on human published from 1998 through 2003. I have attached the resulting 294 titles for your review. If you would like abstracts or full text of any of them, please let me know.

The fourth enzyme in which you were interested, quinone peroxidase was not found in Medline.

If you need additional assistance, please call me at 4-4854.
